↓ This column is doctor's use only.

1.  Half my body hurts.
2.  Heel spurs, history of rolling ankle (left, right)
3.  Writing in all different directions.
4.  I prefer rock or rap music.
5.  Analytical
6.  Miss the gist of a story or last to get a joke.
7.  Poor singer or change in ability to sing.
8.  History of suicidal thoughts.
9.  Tend to write very small.
10.  Fatigue reading novels or difficulty visualizing images
11.  Very good at finding mistakes (e.g. spelling)
12.  I love crossword puzzles.
13.  When you look in a mirror do you feel as though the reflection is looking at you.
14.  Tend to withdraw.
15.  Shortness of breath.
16.  Recognize face but not name of person.
17.  Tend to be happy, affectionate, hugs and kisses.
18.  Tend to write very large.
19.  Fatigue reading technical material
20.  Difficulty seeing patterns.
21.  I love doing mazes.
22.  Others complain that you always think you are right.
23.  Difficulty remembering a phone number when someone calls it out to me.
24.  Difficulty parallel parking.
25.  Difficulty catching or hitting baseball.
26.  Difficulty planning.
27.  Difficulty learning.
28.  Difficulty sequencing events in the proper temporal order.
29.  Difficulty establishing and maintaining a behavior.
30.  Difficulty changing a set behavior.
31.  Difficulty modeling someone's behavior but if told how to do something then can do it.
32.  Tend to lose focus on visual tasks
33.  Walk into a room and forget what you went in there for.
34.  Personality changes, mood, affect
35.  Start projects don't finish; difficulty with attention to tasks
36.  Difficulty with initiation, motivation.
37.  Incontinent and don't care.
38.  Spontaneous crying or laughter.
39.  Engage in activities that are very risky.
40.  Notice rapid, jerky, involuntary movements.
41.  Changes in how things taste or smell or difficulty imagining how things taste or smell.
42.  Easily distracted by ordinarily insignificant stimuli
43.  Lack social tact, antisocial
44.  Monotone speech or very low pitch voice.\*
45.  Words get stuck, can't get them out.
46.  Difficulty having insight into a situation.
47.  Difficulty making judgments.
48.  Constant ideas popping in and out of head.
49.  Stumble over words and gets worse as continue talking or when fatigued.
50.  Penmanship deteriorates as continue to write.
51.  Numbness
52.  Become agitated, irritable.
53.  Less empathetic than used to be.
54.  Very high pitch voice.
55.  Attention difficulties associated with hyperactivity.
56.  Difficulty identifying familiar objects.
57.  Thought processing seems to be slow.
58.  Reading comprehension problems
59.  Reading skill problems
60.  Stuck on ideas or things, can't let go.
61.  Difficulty finding solutions to new problems.
62.  Change in bladder function (difficulty starting, stopping flow, sudden urges, increased frequency)
63.  Forget why walked into room "Forgot what I was doing"
64.  Poor time management; chronic tardiness.
65.  Disorganized

1. Hemisphericity
2. Hemisphere, hypotonia; ↓FRA

66.  Procrastinate  
67.  Emotionally unavailable  
68.  Trouble learning from experience.  
69.  Short term memory problems.  
70.  Social and test anxiety.
71.  Worry a lot.  
72.  Hold onto "hurts" from the past.  
73.  Get stuck on thoughts.  
74.  Get stuck on certain behaviors.  
75.  Argumentative, oppositional behavior.  
76.  Uncooperative, tendency to say no.  
77.  Addictive personality (alcohol, nicotine, eating).  
78.  Chronic pain.  
79.  Very inflexible mentally.  
80.  Eating disorders.  
81.  Road rage.
82.  Yawning constantly  
83.  Moody, irritable, clinical depression.  
84.  Increased negative thinking.  
85.  Perceive events in a negative way.  
86.  Flood of negative emotions.  
87.  Appetite or sleep problems.  
88.  Decreased or increased sexual responsiveness.  
89.  General sense of not feeling well.  
90.  Eating disorders.  
91.  Difficulty with new memories.  
92.  Experience a lot of feelings of frustration.  
93.  Face, lip movements or noises.  
94.  Happy all the time.  
95.  Sad, moodiness, irritable.  
96.  Can't recognize very familiar faces.  
97.  Difficulty distinguishing between a happy face and a sad face.  
98.  When laugh one side of smile greater than the other.  
99.  Depression with periods of feeling blissful.  
100.  Past history of amnesia.  
101.  Excessively docile.  
102.  Total lack of fear even when it would seem appropriate.
103.  Difficulty with motor coordination  
104.  Spontaneous movements of muscles, cramps, restless legs, tapping, ticks, tremors.  
105.  If try and stop ties or tremors get anxious.  
106.  Difficulty getting movement going (e.g. feel like feet are stuck to floor)  
107.  Sleep disturbances.  
108.  Obsessive thoughts or behaviors or songs get stuck in head  
109.  I don't experience emotion.  
110.  I have difficulty suppressing emotion.  
111.  Panic attacks.  
112.  Tendency to predict the worst.  
113.  Conflict avoidance.  
114.  Muscle tension, soreness.  
115.  Headaches.  
116.  Low or excessive motivation
117.  Use incorrect words and are aware of the error.  
118.  Difficulty hearing differences in the tones of music.  
119.  Sometimes language sounds foreign.  
120.  Spontaneous "out of the blue" emotional or behavior changes.  
121.  Déjà vu, sense that things feel unreal, visual or auditory hallucinations.  
122.  Feel that your feelings are not your own.  
123.  Sudden fear, anger or sexual feelings.  
124.  Become paranoid about things.  
125.  Become delusional in any way.  
126.  Total loss of sexual interest.  
127.  Intensely emotional, totally lacking in humor.  
128.  Ardently religious, extremely moralistic.  
129.  Difficulty with short term memory.  
130.  Difficulty with long term memory  
131.  Ringing in ears.  
132.  Hearing things that others do not (eg voices, music)  
133.  Hear back ground noise only.  
134.  Dreams where you can't speak or hear?  
135.  Difficulty hearing high pitch sounds  
136.  Difficulty hearing low pitch sounds  
137.  See shadows.  
138.  Sense presence of others.  
139.  Sometimes can't distinguish between what is real and what is not.

139. Temporal ↓

140.  Sometimes can't distinguish between inanimate and animate objects.
141.  Difficulty identifying "what" a moving object is.
142.  Difficulty recognizing familiar faces
143.  "Evil", dark or violent thoughts.
144.  Aggressive behavior.
145.  Sensitivity to slights.
146.  Reading difficulties.
147.  Emotional instability.
148.  Problems with bowel function; constipation; diarrhea; blood pressure; heart rate.
149.  Anxiety
150.  Sense of world spinning or you spinning.
151.  Letters are sometimes seen backward.
152.  Get claustrophobic, tunnel vision or that the world is closing in.
153.  Difficulty counting, calculating (e.g. long division).
154.  Have difficulty understanding how you yourself feel.
155.  Without looking, have difficulty knowing "where" in space foot or hand is.
156.  Difficulty with calculations.
157.  Confused between L and R.
158.  Poor observational skills
159.  Odd sensations (e.g. bugs crawling on skin)
160.  Have difficulty understanding how others feel
161.  Difficulty knowing which way is north.
162.  Panic attacks or out of body experience.
163.  Sometimes your left hand or foot does not feel like yours (i.e. disconnected)
164.  Get surprised by things coming from left side.
165.  Difficulty with word problems *DON'T DO*
166.  Do 3 dimensional objects ever appear 2 dimensional
167.  Difficulty identifying a common object.
168.  Difficulty getting dressed.
169.  All sounds, voices, music seem flat.
170.  Difficulty reading people's facial expressions.
171.  Difficulty performing a motor task that has always been easy (e.g. using a hammer or scissors)
172.  Difficulty knowing what is in your pocket (left or right) without pulling it out and looking at it.
173.  Difficulty judging differences in the weight of objects.
174.  Sometimes forget to shave, comb hair or eat food on one side.
175.  Sometimes buttons missed despite paying close attention.
176.  Difficulty identifying moving objects but no problem once they are stationary.
177.  Perceive pain but do not experience any associated emotion with the pain.
178.  Difficulty interpreting emotional content of a verbal conversation.
179.  Visual hallucinations without color.
180.  See visual images of people or objects that are not there; visual hallucinations.
181.  See visual hallucinations of people who communicate with me.
182.  See zig zag lines or waves.
183.  Visual hallucinations with color
184.  Fast jerky movements.
185.  Changes in eating or drinking habits.
186.  Changes in maternal behaviors (if applicable).
187.  Changes in initiating and maintaining behaviors that you find rewarding
188.  Disturbances of sleep / wake cycle.
189.  Difficulty focusing on something near or far and gets worse when tired.
190.  Dizzy when going down stairs or escalators.
191.  Find lights and / or sounds to be too intense at times.
192.  Whole body hurts.
193.  Do you notice increased sweat more on one side than another.
194.  Dry eyes, nose, mouth or tearing of eyes and running of nose, excess saliva.
195.  Light headed, nausea, heart palpitations, vomiting, motion sickness.
196.  Change in voice.
197.  Difficulty projecting voice
198.  Difficulties with arousal (i.e. waking up) seem to be half asleep all the time.
199.  Difficulty relaxing, falling asleep, constantly keyed up.
200.  History of blood pressure problems low or high.
201.  History of respiration problems.
202.  Get heart palpitations or fluttering or racing heart.
203.  World spins (Left or Right)\*
204.  You spin (Left or Right)\*
205.  Get double vision when look to one side.
206.  Often bite tongue or cheek.
207.  Difficulty localizing the direction of a sound.
208.  Voice is really soft.
209.  Often feel sick to stomach, eyes tear, mouth waters.
210.  Snoring or choking on food.

197. Brainstem (Plosive)
198. Brainstem RF
199. Brainstem RF
200. Brainstem Med / Pons
201. Brainstem Med / Pons
202. Brainstem
203. Brainstem, Cerebellum, PIVC
204. Brainstem, Cerebellum, PIVC
205. Get double vision when look to one side.
206. Pons
207. Pontomedullary
208. Pontomedullary (Nucleus Ambiguous); ↓ CB
209. Pontomedullary; NTS ↑; Fastigial output ↑; Cerebellar ↓
210. Pontomedullary

211.  Changes in heart, lung, gut, bowel or bladder or sexual function.

212.  Difficulty visualizing a performance, activity or physical action.

213.  Change in position makes you light headed.

214.  Bump into things (left, right, bilateral)\*

215.  Slurring of speech.

211. PMRF

212. Cerebellum L

213. Cerebellum / NTS / Insular

214. Cerebellum (ipsi) Parietal / Temp (contra)

215. Cerebellum (dysarthria)
